All Products From Us

Our Trusted Partners

Enterprise Resource Planning (ERP)

Dynamics 365 Finance and Operations
enabling proactive operations that boost decision-making, protect revenue, and reduce risk and costs.

Dynamics 365 Business Central
Connects Sales, Service, Finance, and Operations departments to allow them to be smarter, faster, better.

CRM

Quick CRM
Application developed on Power Apps and designed to meet the needs of businesses aiming for rapid and sustainable growth.

QOOT AI
Assistant that orchestrates the collaboration between those systems

Copilot
Work efficiently, increase productivity, and improve business outcomes

Copilot Studio
Low-code platform designed to create, manage, and deploy AI agents.

Power Platform

Microsoft Power BI
Drive decisions with stunning reports and real-time insights from across your entire organization.

Microsoft Power Automate
Increase operational efficiency by automating repetitive tasks and workflows.

Microsoft Power Apps
Build and deploy professional grade apps without writing extra code.

Microsoft Power Pages
Build websites and customer solutions while securely storing and managing data.

Industrial Automation

Remote I/O
Connect easily and control precisely with Advantech Remote I/O.

Serial USB Communication
Reduce the issues caused by diverse communication in legacy devices

Wireless I/O and Sensor
Connect the worksite to the cloud

Embedded Automation Computers
Drive your devices with endless intelligence.

Intelligent Connectivity
Create stable and secure network connectivity solutions for your IoT

Sustainability Management

Quick Carbon R
Storing and analyzing Carbon Footprint . Connects with ERP & IoT, supports ISO-14064 and the GHG Protocol standards.

Quick Energy
monitor, analyze, and improve energy consumption across enterprises and industrial plants. enhance business sustainability

Manufacturing Operations Management

Quick MES
Manages shop floor production in real-time, from raw materials right through to finished

Quick PM
Software for scheduling maintenance/inspection and reporting repairs for assets.

Quick QMS
Display work procedures and record results via a display screen, connect to IoT Devices, and reduce data entry errors.

FactoryTalk DataMosaix
Designed to solve "crate issues," it tracks inventory , connecting with the ERP system to allow for real-time stock deduction.

Quick WES
Warehouse equipment management to ensure rapid routing for goods handling.

PLEX PLEX MES
Drive Efficiency with Error-Proofed Workflows and Real-Time Visibility

HMI & IoT

Vuforia
Create stable and secure network connectivity solutions for your IoT

FactoryTalk Optik
Future-Proof Your Operations with Cloud-Enabled Visualization

Intelligent HMI
A display device that allows users to interact and exchange data with machines.

SCADA

WebAccess SCADA
Alert, command and control, and display values on a 100% genuine web application.

WebAccess CNC
It features essential CNC data reading functions and enhances SCADA connectivity capability in the CNC market.

Vertical Solutions

Quick PMS
Manage your Front Office, Back Office, and Operations for a systematic, automated, and real-time hotel business.

Quick HIS
Empowering hospitals and beauty clinics with unified patient data and efficient management solutions for better operational performance.

Quick DMS
Converts paper records into a secure, searchable electronic filing system to achieve a paperless organization.

Modern Workplace

Microsoft 365
Turn your business ideas into reality with the essential tools from anywhere.

Microsoft Teams
Collaborate more effectively with a faster, simpler, smarter, and more flexible with Teams.

Quick OMS
A unified order management system for retail and online sales that tracks inventory, payments, and delivery status.

Quick AIX
AI-powered text reader that automatically extracts data from physical documents and converts it into digital format.
